

TO: Comcast, DPUC, NCPA
FROM: Tri-State Public Communications, Inc
RE: Transfer of Local Access from Tri-State to NCPA

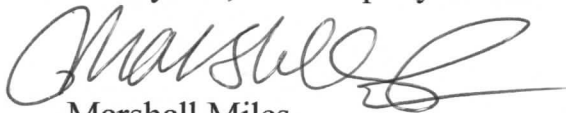

To whom it may concern:

With Tri-State's public radio stations requiring more and more attention, Tri-State Public Communications proposes to transfer all assets of the local access channel from Tri-State Public Communications to Northwest Corner Public Access Inc.

This transfer would involve no money, all equipment at 77 South Canaan Road would be transferred, and all operations of said public access television station, managerial, financial, programming, etc, would become the responsibility of NCPA. The only requirement that Tri-State has, is the termination of our lease, transferred to NCPA with Geer, at 77 South Canaan Road, and the transfer of all existing telephone lines (voice and fax), from Tri-State to NCPA at 77 South Canaan Road, and Comcast bills also transferred to NCPA from Tri-State (if any) at 77 South Canaan Road.

After transfer, NCPA would be the sole operator of the local access franchise with Comcast.

We feel with the terrific work that Mike Flint has done as manager the past three years, his company is the most suitable for operation of the channel.

Marshall Miles

President

Tri-State Public Communications
